Table 1: List of features and their descriptions in the dataset

Nominal Nominal Numeric Nominal Nominal Nominal	Description and values  Unique identifier of a patient  Values: Caucasian, Asian, African American, Hispanic, and other  Values: male, female, and unknown/invalid  Grouped in 10-year intervals: [0, 10), [10, 20),, [90, 100)  Weight in pounds.  Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available  Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available  Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital  Integer number of days between admission and discharge  Integer identifier corresponding to 23 distinct values, for example, Blue Cross\Blue
Nominal Nominal Numeric Nominal Nominal Nominal Numeric	Values: Caucasian, Asian, African American, Hispanic, and other  Values: male, female, and unknown/invalid  Grouped in 10-year intervals: [0, 10), [10, 20), , [90, 100)  Weight in pounds.  Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available  Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available  Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital  Integer number of days between admission and discharge
Nominal Nominal Numeric Nominal Nominal Nominal	Values: male, female, and unknown/invalid Grouped in 10-year intervals: [0, 10), [10, 20),, [90, 100) Weight in pounds. Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital Integer number of days between admission and discharge
Nominal Numeric Nominal Nominal Nominal Numeric	Grouped in 10-year intervals: [0, 10), [10, 20),, [90, 100)  Weight in pounds.  Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available  Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available  Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital  Integer number of days between admission and discharge
Numeric Nominal Nominal Nominal	Weight in pounds.  Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available  Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available  Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital  Integer number of days between admission and discharge
Numeric Nominal Nominal Nominal	Weight in pounds.  Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available  Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available  Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital  Integer number of days between admission and discharge
Nominal Nominal Nominal Numeric	Integer identifier corresponding to 9 distinct values, for example, emergency, urgent, elective, newborn, and not available Integer identifier corresponding to 29 distinct values, for example, discharged to home, expired, and not available Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital Integer number of days between admission and discharge
Nominal Numeric	home, expired, and not available Integer identifier corresponding to 21 distinct values, for example, physician referral, emergency room, and transfer from a hospital Integer number of days between admission and discharge
Numeric	emergency room, and transfer from a hospital Integer number of days between admission and discharge
Nominal	Integer identifier corresponding to 23 distinct values, for example, Blue Cross\Blue
	Shield, Medicare, and self-pay
Nominal	Integer identifier of a specialty of the admitting physician, corresponding to 84 distinct values, for example, cardiology, internal medicine, family\general practice, and surgeon
Numeric	Number of lab tests performed during the encounter
Numeric	Number of procedures (other than lab tests) performed during the encounter
Numeric	Number of distinct generic names administered during the encounter
Numeric	Number of outpatient visits of the patient in the year preceding the encounter
Numeric	Number of emergency visits of the patient in the year preceding the encounter
Numeric	Number of inpatient visits of the patient in the year preceding the encounter
-	The primary diagnosis (coded as first three digits of ICD9); 848 distinct values
+	Secondary diagnosis (coded as first three digits of ICD9); 923 distinct values
Nominal	Additional secondary diagnosis (coded as first three digits of ICD9); 954 distinct values
Numeric	Number of diagnoses entered to the system
Nominal	Indicates the range of the result or if the test was not taken. Values: ">200," ">300," "normal," and "none" if not measured
Nominal	Indicates the range of the result or if the test was not taken. Values: ">8" if the result was greater than 8%, ">7" if the result was greater than 7% but less than 8%, "normal" if the result was less than 7%, and "none" if not measured.
Nominal	Indicates if there was a change in diabetic medications (either dosage or generic name). Values: "change" and "no change"
Nominal	Indicates if there was any diabetic medication prescribed. Values: "yes" and "no"
Nominal	For the generic names: metformin, repaglinide, nateglinide, chlorpropamide, glimepiride, acetohexamide, glipizide, glyburide, tolbutamide, pioglitazone, rosiglitazone, acarbose, miglitol, troglitazone, tolazamide, examide, sitagliptin, insulin, glyburide-metformin, glipizide-metformin, glimepiride-pioglitazone, metformin-rosiglitazone, and metformin-pioglitazone, the feature indicates whether the drug was prescribed or there was a change in the dosage. Values: "up" if the dosage was increased during the encounter, "down" if the dosage was decreased, "steady" if the dosage did not change, and "no" if the drug was not prescribed
Binary	Indicates if the patient was readmitted in less than 30 days of discharging "TRUE", and "FALSE" otherwise.
